

## PowerTradeCopier Module “DukasCopy JForex Bridge”

JForex Bridge allows you to use to copy trades from one or several MetaTrader 4 terminals to one or several JForex (DukasCopy) accounts, using all features of PowerTradeCopier. Bridge works with no delay. You do not need to run platforms. This tool will be useful for forex traders, money managers, brokers. If you forex trader you can use your MT4 expert advisors under MT4 terminal control and copy trades to DukasCopy account. If you money manager, you can manage MT4 and JForex accounts simultaneously, using most powerful multiterminal for money managers. If you broker, you can copy successful strategies to DukasCopy.

### How to use JForex Bridge

1. Edit jforexbridge.ini file (provisional, in next version this function will migrate to PowerTradeCopier). Example:

```
[30000]
```

```
jnlUrl=https://www.dukascopy.com/client/demo/jclient/jforex.jnl
```

```
userName=DEMO2ymSAL
```

```
password=ymSAL
```

```
[30001]
```

```
jnlUrl=https://www.dukascopy.com/client/demo/jclient/jforex.jnl
```

```
userName=DEMO10037cUQEeEU
```

```
password=cUQEe
```

```
[30002]
```

```
jnlUrl=https://www.dukascopy.com/client/live/jclient/jforex.jnl
```

```
userName=EDU-FXD5347xD
```

```
password=GM7QrOtx6z
```

```
pin=pin
```

Each section starts with section name which means computer's port number.

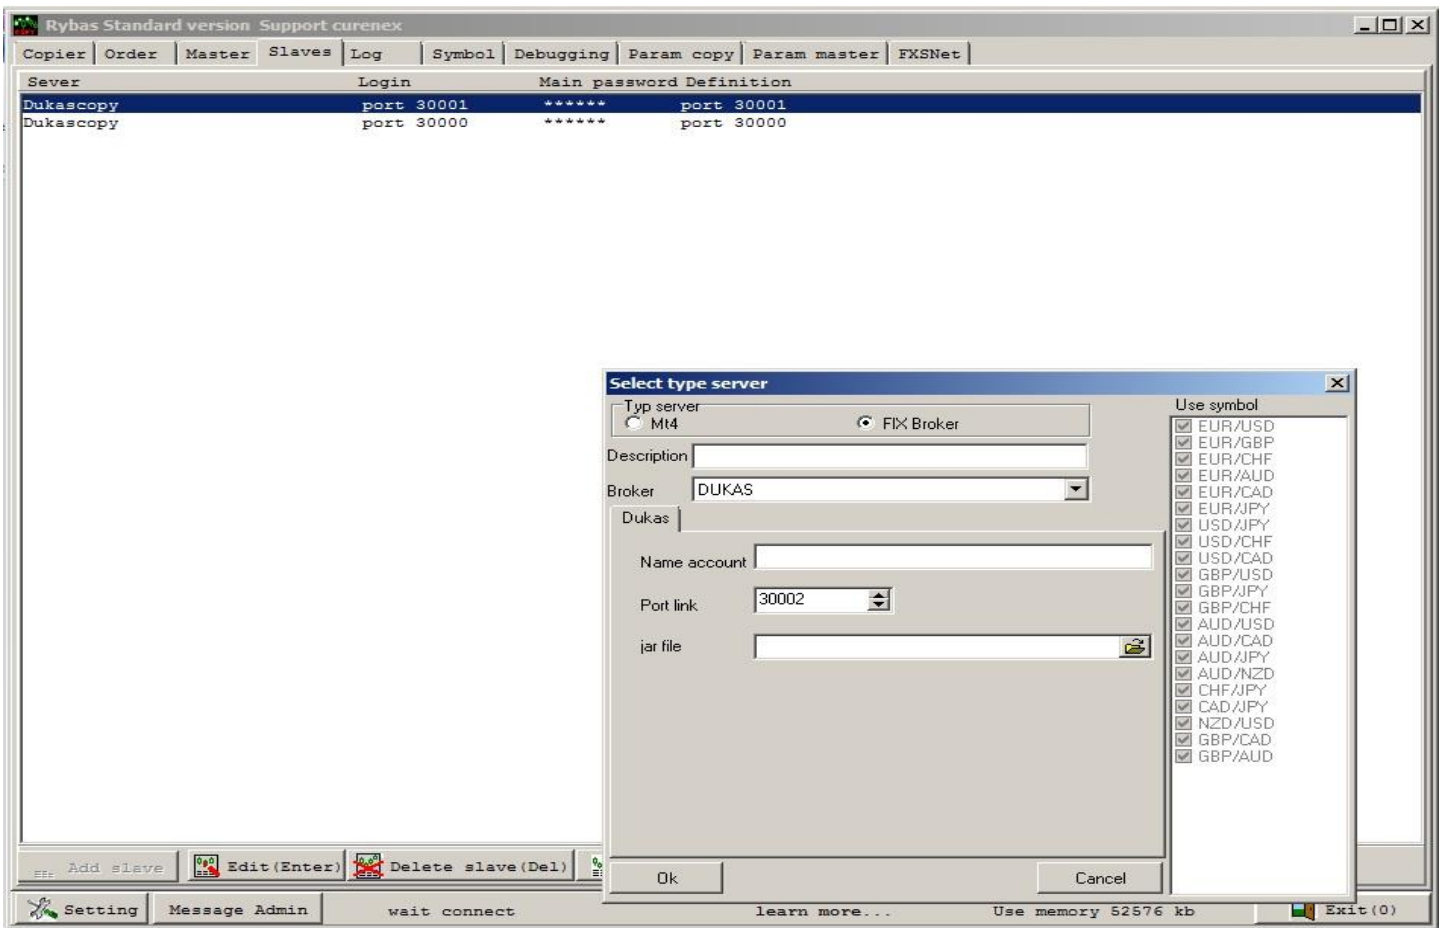

jnlUrl is address of jnl file, which launches JForex connection. Take attention, sections 30000 and 30001 works with Demo accounts, 30002 – with Live account, jnlUrl differs accordingly.

userName and password are self explanatory.

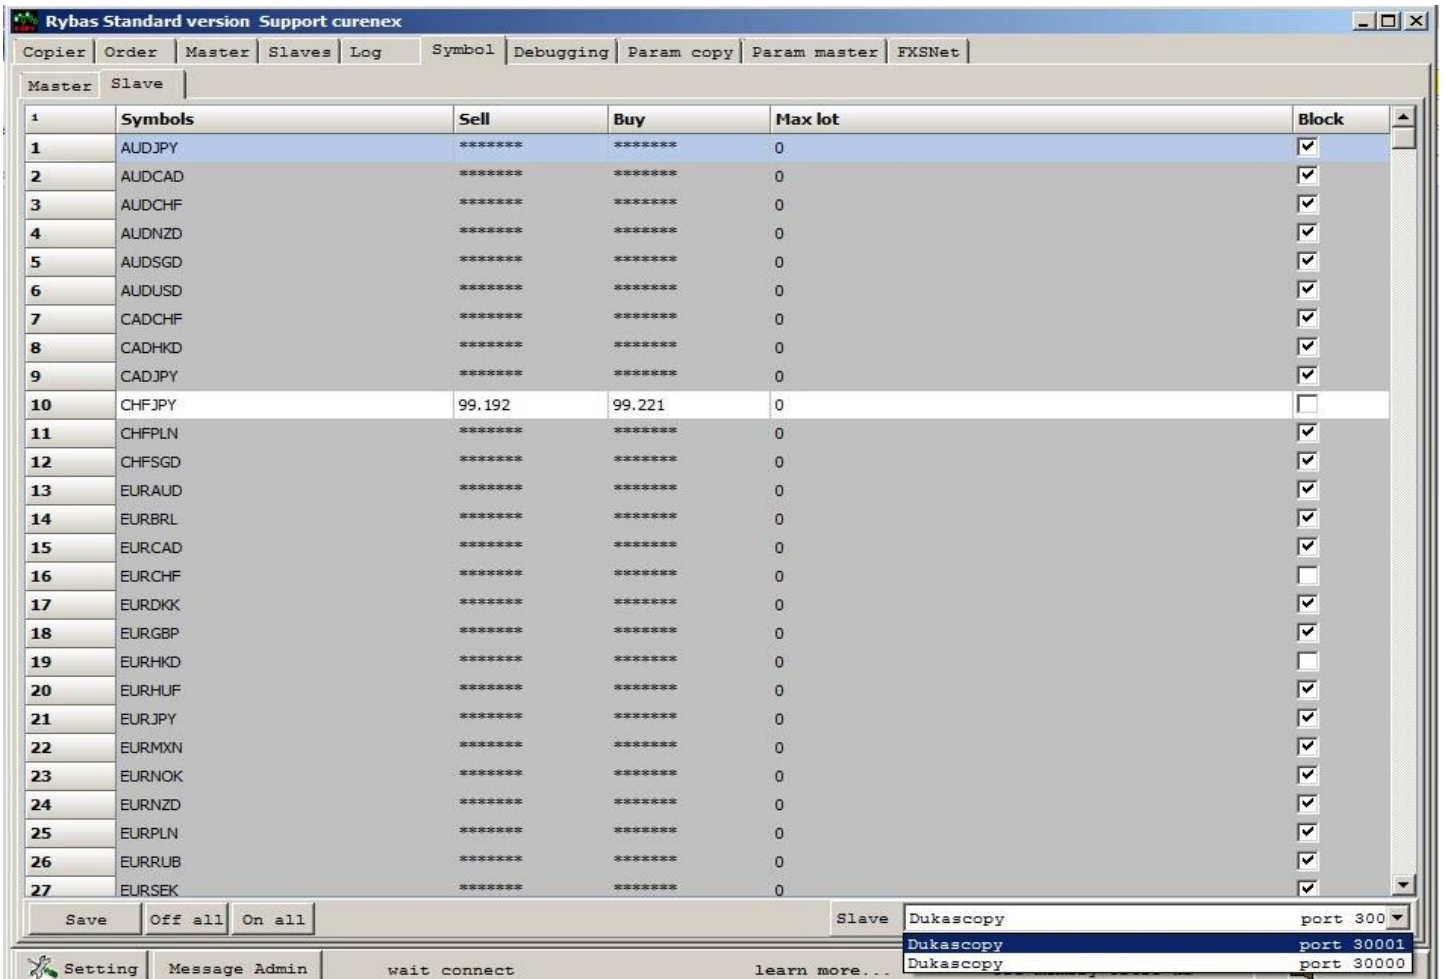

pin must be not empty for Live account, not obligatory real pin meaning.

2. Tune PowerTradeCopier:

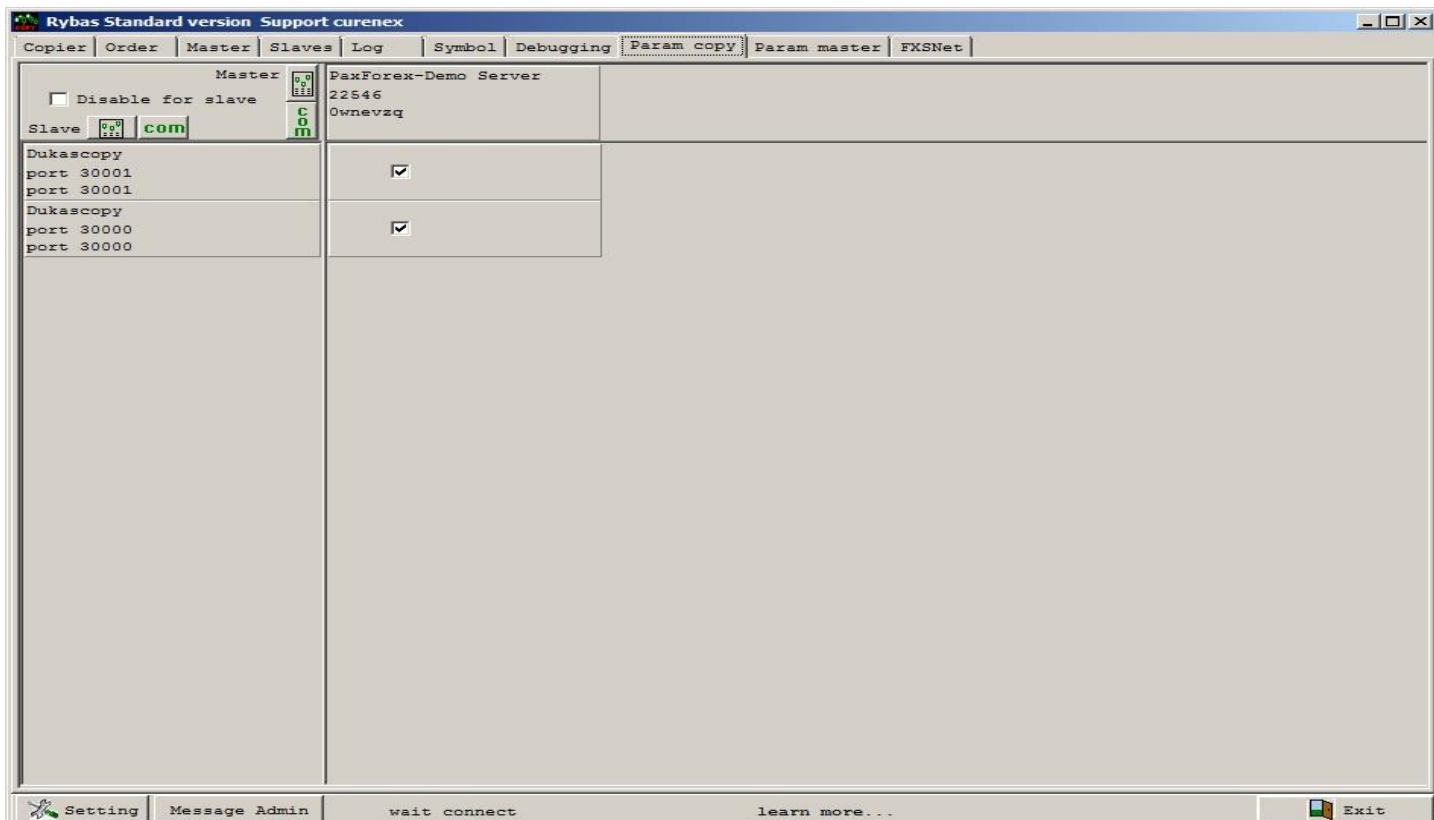

Add JForex slave(s):

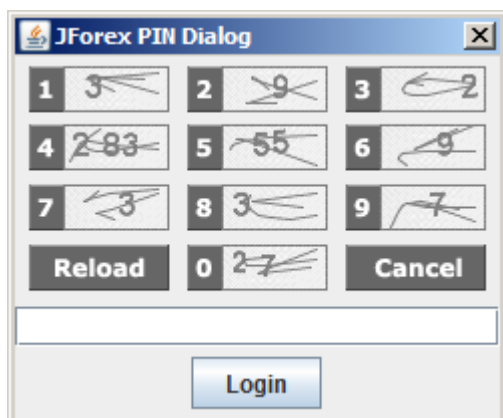

Unblock necessary symbols for every slave

Switch on copy function

3. Restart PowerTradeCopier.
4. Enter captcha for every Live account (rules about see at JForex page):

5. You can control each JForex terminal in separate window. You see windows with orders tables for each account and console windows for all of them. Console window contains important service information, but it is not necessary for copying.
